Is the air you breathe healthy? In fact, there are a lot of pollutants in the air that we can't see, which endanger our health. You need AVICHE's air quality monitor to help you track the invisible in the air.

The air, you're breathing, is safe?

Is the air you breathe healthy? In fact, there are a lot of pollutants in the air that we can't see, which endanger our health. You need AVICHE's air quality monitor to help you track the invisible in the air.

Track the Killer In The Air-HCHO/TVOC

Formaldehyde is an important cause of indoor pollution. In addition to decoration, in fact, newly purchased furniture and various furniture products will release it. It can cause cancer during the long-term inhalation.

TVOC is one of the three most serious pollution that affects indoor air quality, mainly from adhesives in construction and decoration materials, paint, furniture, household appliances, furniture, etc.

TVOC and HCHO can cause the body's immune level imbalance, causing dizziness, headache, drowsiness, weakness, chest tightness and other conscious symptoms;

Large display of TVOC/HCHO

The large display screen can not only clearly see the formaldehyde/TVOC concentration, but also know the indoor air quality according to the color.

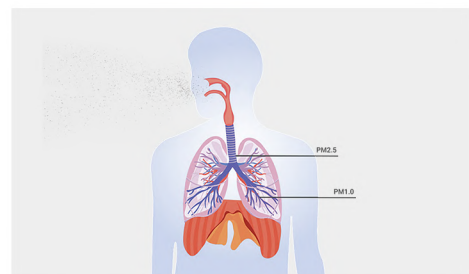

More sensitive—high accurate sensors

Laser PM2.5 sensor ,more accurate and reliable .unique HCHO and TVOC sensor monitor harmful chemical pollution of room,temperayture and humidity sensor help maintain comfortable indoor life environment.

Temperature/humidity More comfortable environment

Humidity: humidity can affect how healthy you feel on a daily basis and aggravate preexisting conditions such as asthma and eczema.

Temperature : it affects more than just your comfort, also influence your performance, sleep quality, and immune system

Track smaller particles-PM1.0/PM2.5

Many similar machines can only detect PM2.5. The aviche air quality detector can detect pm1.0 in addition to pm2.5. The diameter of PM1.0 is less than pm2.5. It can directly enter the alveolar cells inside the respiratory tract, which is more harmful to human health.
